

Orchids are Different but not Difficult

At the January meeting, Beth Davis was on hand to share her vast knowledge about orchids. Not only did Beth impart a plethora of information about the proper lighting, watering, fertilizing, temperature/ humidity, and repotting/grooming required to have a happy, productive orchid, she also demonstrated the correct way to re-pot one. In addition to the wealth of information, Beth proved to be a wonderful resource when answering questions. All attendees left with a four-page handout recapping the data

Beth Davis

shared. What a wonderful reference to have and help us as we discover,

“Orchids are different but not difficult”.
